Robin Turner

ABOUT

Software Engineer | **Python & Node.js** | **Philosophy MA**

Software Engineer with a Philosophy MA, specialising in AI-powered applications – Python, Django, FastAPI, and RAG-based systems. Background founding and shipping production AI products end-to-end (Lando, Medical Report Summariser), now applying that same product instinct as part of a team at Aegaea. Conversational in **Japanese** and **Korean**.

WORK EXPERIENCE

Aegaea | **Pororoca** – *Software Engineer*

07/2026 – present

- Building and maintaining features for Ask Atticus, a planning application assessment tool, across a React/TypeScript frontend and Django/FastAPI backend.
- Collaborating with senior developers and stakeholders using Git/GitHub workflows to debug, test, and ship changes.

Independent – *Self-taught Full Stack Developer / AI Engineering*

08/2025 PRESENT

Medical Report Summarisation | **Python, FastAPI, HuggingFace Transformers, PyTorch** (<https://medical-summariser.onrender.com/>)

- Fine-tuned a T5 Transformer on medical datasets to convert clinical findings into concise, actionable impressions.
- Deployed via Docker on Hugging Face Spaces with custom memory management to run on constrained hardware.
- Built a FastAPI backend using SentencePiece/Protobuf for fast tokenization and low-latency inference.

Lando: Compliance-as-a-Service (CaaS) Platform | **Python, Flask, Stripe API, Google Gemini Pro** (<https://lando-ai.uk>)

- Built a full-stack audit platform that checks UK tenancy agreements for compliance with the Renters' Rights Act [2025/2026], returning results in seconds.
- Designed a privacy-first architecture using UUID-based file isolation and no long-term data retention, aligned with GDPR.
- Built an end-to-end Stripe Checkout monetisation flow, including automated invoice generation.

- Iterated on prompt engineering and compliance logic using a structured pass/fail test framework built from legal research.

AI CV Critique Tool | Python, Streamlit, OpenAI, PyPDF2
[\(https://ai-cv-critiquer.onrender.com/\)](https://ai-cv-critiquer.onrender.com/)

- Built an end-to-end app that extracts text from uploaded CVs and returns structured AI feedback on clarity, skills alignment, and role fit using GPT models.
- Deployed on Streamlit/Render with secure environment-based API key management.

Self-employed – Property Developer

08/2010 – 07/2026

- Managed renovation project lifecycles end-to-end and built financial forecasting models to assess investment viability.

KaiBaiBo, Liverpool – Restaurant Owner

02/2022 – 02/2025

- Ran day-to-day operations, customer communication, and business data (scheduling, finance, inventory); built and maintained the restaurant's digital presence.

EDUCATION

Birkbeck, University of London – MA Philosophy (Focus on Phil of Mind, logic and systems of thought) 09/2009 – 09/2010

Lancaster University – BA(Hons) Philosophy 09/2006 – 07/2009

SKILLS

<u>Artificial Intelligence & Machine Learning</u>	<u>Data & Mathematics</u>	<u>Programming & Tools</u>
• Machine Learning (supervised learning, model evaluation) • Deep Learning (TensorFlow, CNNs) • Feature engineering and data preprocessing	• Data analysis and exploratory data analysis (EDA) • Statistics and probability • Mathematical foundations for data science	• Python (Django, FastAPI) • SQL • JavaScript (Node.js, Express) • R • MongoDB & Mongoose • Git & GitHub • Command Line Interface (CLI)

CERTIFICATES

Microsoft Azure AI Fundamentals (AI-900)

LANGUAGES

English (native)

Japanese(speaking/reading/writing -
conversational)

Korean (speaking/reading/writing -
conversational)
